

Grease filters

General information:

- ✓ Design: Interlocking metal plates (stainless steel or aluminum) that force air to change direction, trapping grease.
- ✓ Benefits: Superior flame barrier, good grease capture, durable, easy to remove and clean (often in sinks)
- ✓ Use: Ideal for high-heat cooking (fryers, grills) where fire risk is higher.
- ✓ Design: Layers of metal mesh (aluminum or galvanized steel) in a frame. Benefits: Cost-effective, captures large particles, good for low-grease
- ✓ Applications. Use: Type 2 hoods (steam, ovens) for heat/moisture, not heavy grease; often placed before the fan.

Address: Unit 8/53-55 Dingley Ave, Dandenong VIC 3175
